Forecast for Thursday 29 Sep 2022

Weather: Rather cloudy start with some patchy light rain or drizzle possible at first but brighter spells more readily appearing late morning and through the afternoon, bringing the chance of a few isolated and light afternoon showers. These die away early evening, while layers of cloud gradually thicken and lower from the west towards midnight.

Chance of cloud-free hill tops above 800m: 60% at first becoming 90% for the afternoon, before lowering 70% in the west towards midnight.

Low cloud and visibility: Visibility good or very good becoming moderate or poor in rain, drizzle and showers, also very poor within cloud with bases quite extensive from 600m at first, before largely breaking and lifting above summits from late morning, then lowering across western ranges again towards midnight.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Gales developing over higher summits during the late evening.

Forecast for Friday 30 Sep 2022
Weather: Inclement with a broad band of occasionally heavy rain across the area for the morning, coupled with severe gales to storm force summit winds to bring potentially hazardous conditions. This improves a little for the afternoon to a more showery picture, but these will be frequent, heavy at times, potentially bringing risk of hail and thunder to the western ranges later.

Maximum wind: South 50 mph at first with gusts reaching 70-75mph at times across most exposed ridges and summits, veering to the west and easing from early afternoon.

Chance of cloud-free hill tops above 800m: 10% or less becoming during the afternoon 30% in west 50% in east

Low cloud and visibility: Visibility initially mainly moderate or poor under the cloud, poor within with bases extensive down to 500m with patches lower down, becoming occasionally good in the afternoon improvement.

Temperature: **Glens:** Plus 6 Celsius
At 800m: Plus 15 Celsius
Freezing level: Above all summits
